

ETC ColorSource Spot

Lighting versatility for every budget

A limited budget doesn't have to mean poor LED lighting. Designed to offer broader colour capability than other four-colour luminaires, ColorSource Spot brings quality LED lighting into your price range. Developed by colour experts, manufactured at ETC's Wisconsin-based headquarters, and supported by renowned 24/7 service, ColorSource Spot is the perfect luminaire for small budgets.

ColorSource Spot

Works with Source Four LED Fresnel and CYC adapters, and fixed field and zoom lens tubes

A colourful personality

ColorSource Spot beats out the competition with brighter, richer, and more diverse colours. Most budget LEDs use red, green, and blue emitters, possibly with white or amber thrown in; ETC uses lime to add more colour capability, while preserving the bright output needed from a spotlight. ColorSource Spot also maintains its colour consistency by compensating for thermal droop, so its colour won't fade over the course of your show.

Easy to integrate, easy to use

Compatible with any lighting control desk, the ColorSource Spot blends seamlessly with your system. With power in and thru, DMX in and thru, and black, white, silver grey, or custom body paints, it'll feel right at home in your lighting rig. With an intuitive interface right on the fixture, it's also a great tool for non-professional users. Anyone can plug it in and have it shining brightly in no time.

Invest in ETC quality, rely on ETC service

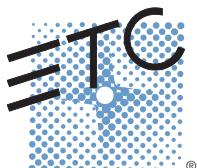

ETC manufactures each ColorSource Spot to extensive design and rigorous testing standards, optically calibrating each luminaire to guarantee the same dependable colour from every unit and ensuring the same durable quality that ETC is known for. And as always, ETC stands behind ColorSource Spot with industry-leading technical service and customer support, available to you 24/7/365.

Optimise and accessorise

Adding to its versatility, the ColorSource Spot accepts zoom and fixed field lens tubes, Source Four® LED CYC and Fresnel adapters, and other accessories for ETC's Source Four LED luminaires, making it an adaptable, affordable addition to any light plot.

Product Features

- Easy-to-use RGB control adds lime automatically when needed
- RDM capability
- Power in and thru PowerCON connectors
- DMX in and thru via 5-Pin XLR or EtherCON/RJ45 connectors
- Droop compensation for consistent output
